

# Radium - Helping Researchers Keep Track of Data

Alex Garnett, Research Data  
Management & Systems Librarian, SFU

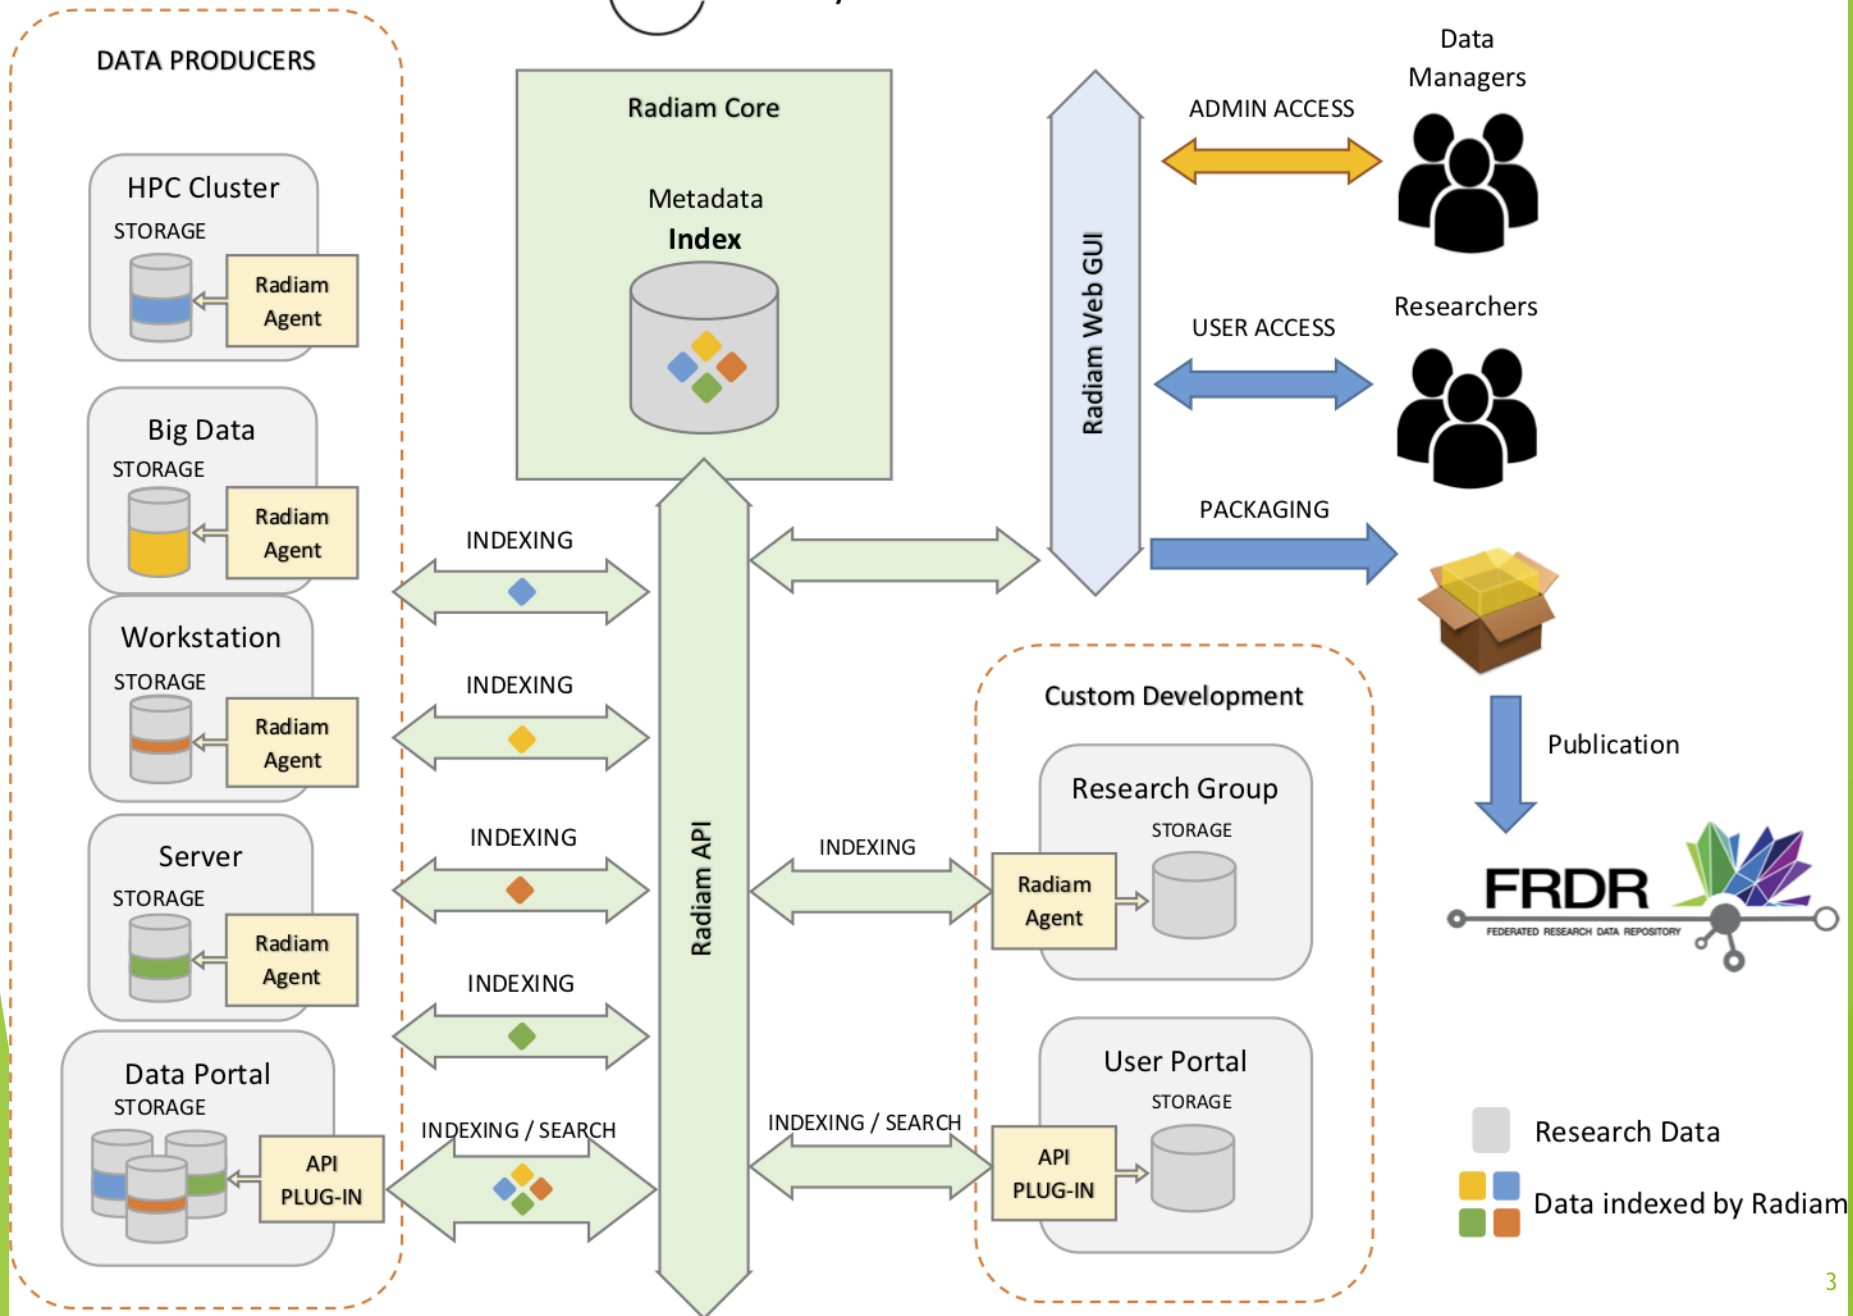

Portage Tech Tools  
Showcase, 6/16/20

# What Is Radiam

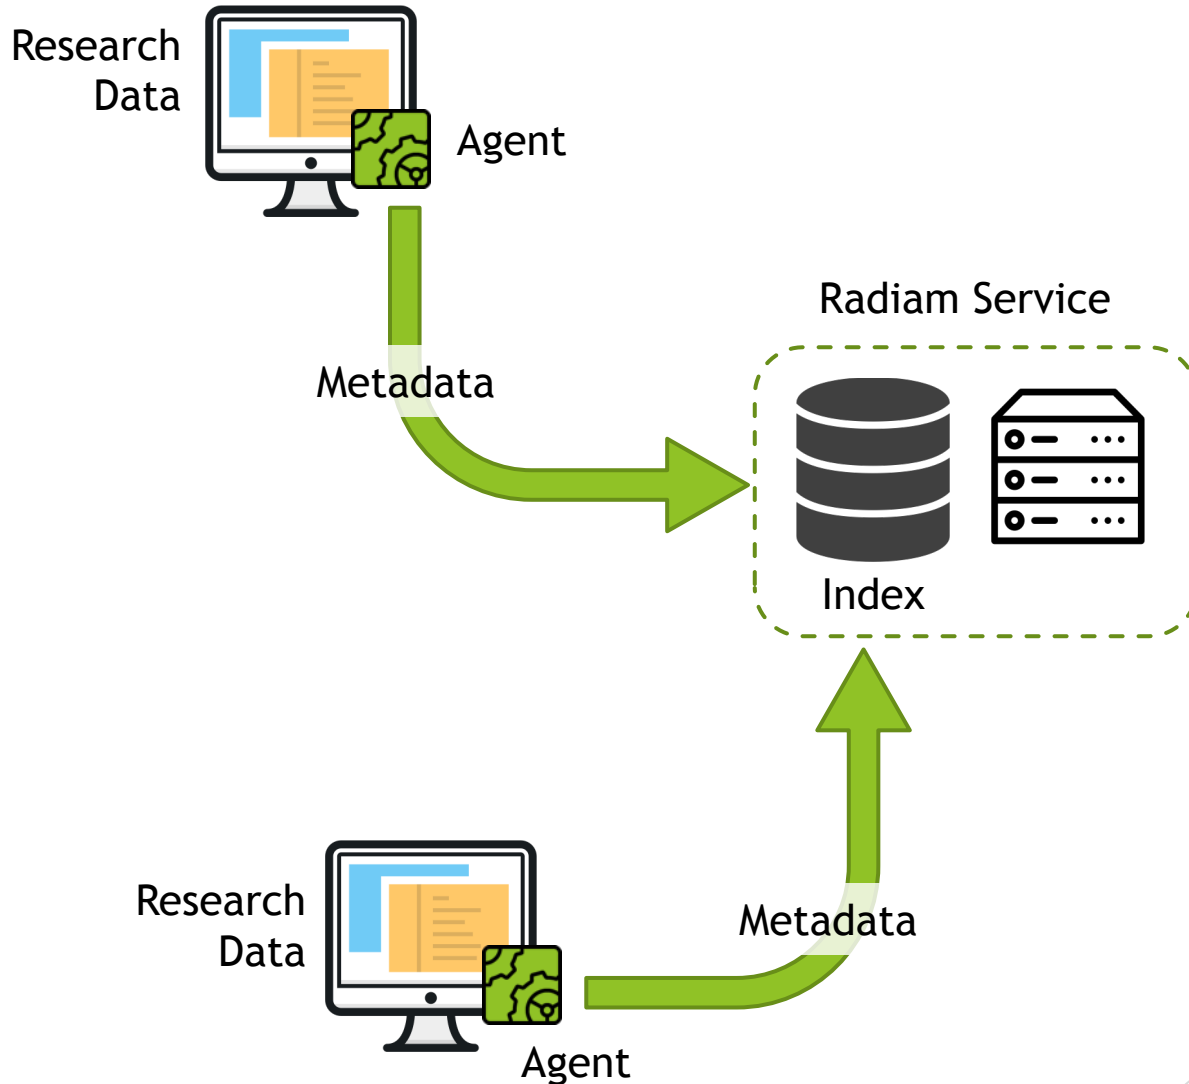

A **platform** and a **suite of applications** that work together to catalog research data, allowing rich metadata entry and logical grouping of data, and then exporting of metadata in preparation for publishing

Public web site: <https://www.radium.ca>

# Radium System Architecture

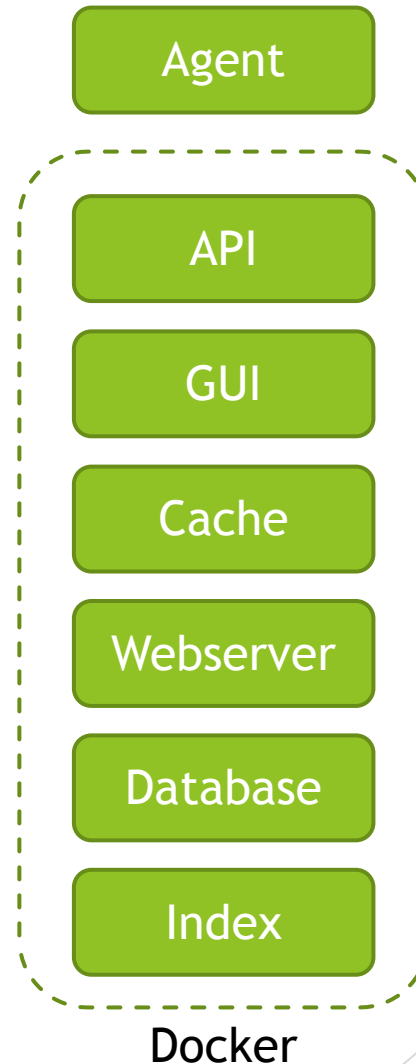

# Radium In Operation

# Technology

- ▶ Django REST
- ▶ React
- ▶ Postgres
- ▶ Elasticsearch
- ▶ Memcached
- ▶ Nginx
- ▶ Electron
- ▶ Docker Swarm
- ▶ Docker Registry
- ▶ Ansible

# Progress Update

## ▶ API

- ▶ All REST endpoints working
- ▶ OpenAPI specification and documentation

## ▶ Web Interface

- ▶ Create account, log in, reset password
- ▶ Manage users, groups, projects and datasets
- ▶ View and search indexed metadata

## ▶ Agent

- ▶ Built and running on Windows, Mac, Linux
- ▶ Index data for multiple projects with one agent
- ▶ Metadata extraction for some file types

## ▶ Portal Integrations

- ▶ OSF: auth, indexing
- ▶ HubZero: auth, indexing

# Web Interface

The screenshot displays the Radiam V1.2.6 web interface. The top navigation bar is blue and contains the Radiam logo, version number, and an ADMIN link with refresh and help icons. A left sidebar lists navigation options: Home, Users, Groups, User Roles, Group Membership, Location Types, Locations, Projects, Datasets, Project Icons, Data Collection Methods, Data Collection Statuses, Data Restriction Levels, Data Sensitivity Levels, View Grants, and Agents. The main content area is divided into three tabs: SUMMARY, FILES, and BROWSE. The BROWSE tab is active, showing a file browser for the 'Sediment Bedload' project. The browser displays a table of files with columns for File Name, File Size, File Path, and Last Index. A search bar is present above the table. An EDIT button is visible on the right side of the interface.

Project Name

Sediment Bedload

File Name ↑	File Size	File Path	Last Index

EDIT

# Web Interface

The screenshot displays the Radiam v1.2.6 web interface. On the left is a navigation sidebar with icons and labels for Home, Users, Groups, User Roles, Group Membership, Location Types, Locations, Projects, Datasets, Project Icons, Data Collection Methods, Data Collection Statuses, Data Restriction Levels, Data Sensitivity Levels, View Grants, and Agents. The main content area shows a 'SUMMARY' section for a project named 'Sediment Bedload'. Below this is a file list with columns for File Name and Search Files. The file 'Tracer\_Data\_Morningside.xlsx' is selected, and a modal window displays its metadata.

Property	Value

## Radium API

Radium API documentation

### datacollectionmethod

#### list

**GET** `/api/datacollectionmethod/` INTERACT

API endpoint that allows the editing of data collection methods.

#### Query Parameters

The following parameters should be included as part of a URL query string.

Parameter	Description
<code>page</code>	A page number within the paginated result set.
<code>label</code>	

#### create

**POST** `/api/datacollectionmethod/` INTERACT

API endpoint that allows the editing of data collection methods.

#### Request Body

The request body should be a `"application/json"` encoded object, containing the following items.

Parameter	Description
<code>label</code> <b>required</b>	Data collection method label

#### read

**GET** `/api/datacollectionmethod/{id}/` INTERACT

API endpoint that allows the editing of data collection methods.

#### Path Parameters

```
# Install the command line client
$ pip install coreapi-cli
```

```
# Load the schema document
$ coreapi get http://localhost:8100/api/docs/

# Interact with the API endpoint
$ coreapi action datacollectionmethod list -p page=... -p label=...
```

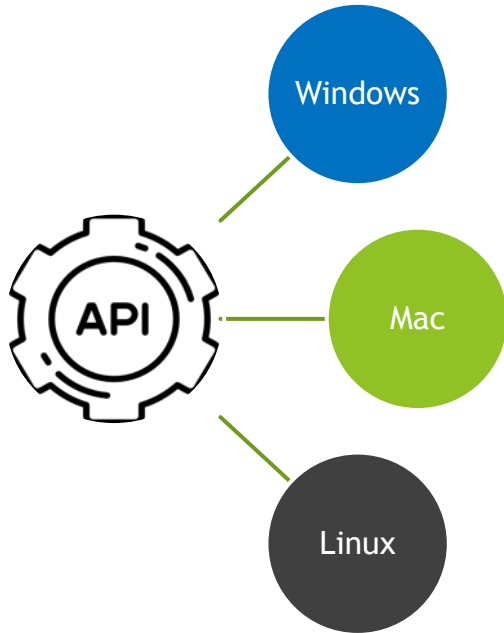

```
# Load the schema document
$ coreapi get http://localhost:8100/api/docs/

# Interact with the API endpoint
$ coreapi action datacollectionmethod create -p label=...
```

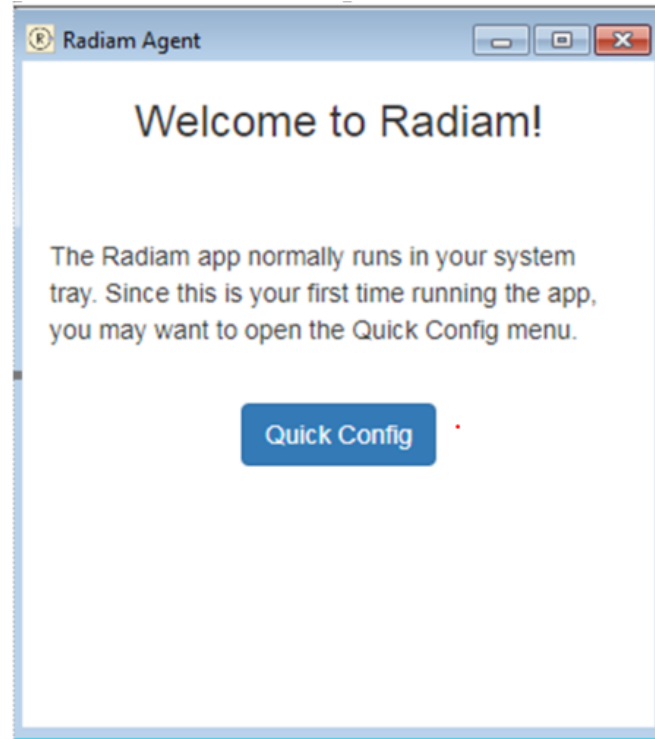

```
# Load the schema document
$ coreapi get http://localhost:8100/api/docs/

# Interact with the API endpoint
$ coreapi action datacollectionmethod read -p id=... -p label=...
```

# Agent

Built and running on 3 platforms

# Open Source

<https://github.com/usask-rc/radium>

The screenshot displays the GitHub repository page for `usask-rc/radium`. At the top, it shows repository statistics: 2 commits, 1 branch, 0 packages, 1 release, 1 contributor, and MIT license. Below this, there are navigation tabs for Code, Issues, Pull requests, Actions, Projects, Wiki, Security, and Insights. A section titled "Open source software for indexing research data" contains a progress bar and buttons for "New pull request", "Create new file", "Upload files", "Find file", and "Clone or download". The main content area shows a commit history table for the initial public release by Todd Trann, listing various files and their commit dates.

File	Commit Message	Commit Date
api	Initial public release	yesterday
gui	Initial public release	yesterday
.env	Initial public release	yesterday
.gitignore	Initial public release	yesterday
Dockerfile.api	Initial public release	yesterday
Dockerfile.gui	Initial public release	yesterday
LICENSE	Initial commit	2 days ago
README.md	Initial public release	yesterday
VERSION	Initial public release	yesterday
Vagrantfile	Initial public release	yesterday
docker-compose.yml	Initial public release	yesterday
oneshot.yml	Initial public release	yesterday
yarn.lock	Initial public release	yesterday

# Future

- ▶ Source code to all components of Radium are published under the MIT open source license
- ▶ The open architecture of Radium allows its components to be upgraded or rewritten to keep up with integration points
- ▶ API specification and developer documentation together allows research groups to write custom applications that work with Radium
- ▶ Published on CANARIE Research Software Portal: <https://science.canarie.ca/>

# Project Members

- ▶ **PI:** Kevin Schneider, University of Saskatchewan
- ▶ **Co-PI:** Dugan O'Neil, Simon Fraser University
- ▶ **Project Lead:** Jason Hlady, University of Saskatchewan
- ▶ **Project Team:**
  - ▶ **CARL/Portage:** Lee Wilson
  - ▶ **SFU:** Alex Garnett, Jonathan Loewen, Jin Zhang, Yang Zhou
  - ▶ **USask:** Adam McKenzie, Joel Farthing, Justin Pointer, Mike Winter, Rama Periasamy, Sergiy Stepanenko, Todd Trann
